AI Skill Gap Intelligence Platform - 15 Slide PPT Guide

Member 1 (Slides 1-5)

1. Title: Project title, members, college, subject, guide.
2. Problem Statement: Students don't know in-demand skills, job requirements change, no personalized roadmap.
3. Objectives: Analyze jobs, identify skills, extract resume skills, find gaps, recommend learning paths.
4. Tech Stack: Python, PostgreSQL/SQL, Pandas, NumPy, spaCy, NLTK, Scikit-learn, Streamlit, Matplotlib, Seaborn, Plotly, Git & GitHub.
5. Dataset & Database: Kaggle/Indeed/LinkedIn; Job Title, Company, Skills, Experience, Location; PostgreSQL overview.

Member 2 (Slides 6-10)

6. Workflow: Job Dataset → Data Cleaning → SQL Database → Resume Upload → Skill Extraction → Skill Gap Analysis → Learning Roadmap.
7. Data Cleaning & EDA.
8. NLP using spaCy, NLTK, Regex.
9. Machine Learning: TF-IDF, Cosine Similarity, skill matching.
10. Recommendation Engine: courses, certifications, projects, roadmap.

Member 3 (Slides 11-15)

11. Streamlit Dashboard.
12. Expected Output.
13. Future Scope.
14. Conclusion.
15. Thank You & Q&A.;

Presentation Division

Member 1: Slides 1–5; Member 2: Slides 6–10; Member 3: Slides 11–15.

Technologies

Python, SQL(PostgreSQL), Pandas, NumPy, spaCy, NLTK, Scikit-learn, Matplotlib, Seaborn, Plotly, Streamlit, Git & GitHub.
